HOUT - WOOD - BOIS - MADERA

NL Onze producten van het assortiment tuinhout zijn gemaakt uit hout. Een natuurproduct en dus logischerwijze milieuvriendelijk en ideaal om in harmonie met de rest van je tuin aan de slag te gaan. Mooi meegenomen is ook dat het makkelijk te bewerken is. Solid selecteert nauwgezet zijn grondstoffen uit Noord- of Oost-Europese bossen.

FR Nos produits de la gamme bois de jardin sont fabriqués en bois, un matériau naturel, et donc respectueux de l'environnement. Le bois est idéal pour travailler en harmonie avec le reste de votre jardin. Autre atout : il est facile à traiter. Solid sélectionne avec soin ses matières premières issues des forêts d'Europe du Nord et d'Europe de l'Est.

EN Our products from the collection wood products are made from wood, a natural product and therefore logically eco-friendly and it blends in ideally with the rest of your garden and easy to treat. Solid carefully selects its raw materials from North or East European forests.

ES Nuestros productos de la gama de madera de jardín están hechos de madera. Un producto natural y, por tanto, lógicamente ecológico e ideal para trabajar en armonía con el resto de su jardín. Otra ventaja es que es fácil de trabajar. Solid selecciona meticulosamente sus materias primas en bosques del norte o del este de Europa.

HOUTSOORTEN - TYPES DE BOIS - WOOD SPECIES - TIPOS DE MADERA

Grenen en vuren - Pin Sylvestre et épicéa - Pine and spruce - Pino silvestre y abeto

Behandeld autoclaaf - groen / Traité autoclave - vert / Treated autoclave - green / Tratado autoclave - verde
Behandeld autoclaaf - bruin / Traité autoclave - brun / Treated autoclave - brown / Tratado autoclave - marrón
Wit gevefnd / Peint en blanc / Painted in white / Pintado de blanco
Onbehandeld / Non-traité / Untreated / No tratado

NL Grote isolatiewaarde en makkelijk te behandelen - Naaldhout afkomstig van verantwoord beheerde bossen.

FR Bonnes propriétés isolantes et facile à traiter. Bois de conifères issu de forêts exploitées de manière responsable.

EN High thermal isolation value and easy to treat. Softwood from responsibly managed forests.

ES Alto valor aislante y fácil de tratar - Madera blanda procedente de bosques gestionados de forma responsable.

Kastanje - Châtaignier - Chestnut - Castaño

Onbehandeld / Non-traité / Untreated / No tratado

NL Flexibel, duurzaam, esthetisch en aangenaam voor het milieu. Kastaneehout is natuurlijk bestendig tegen insecten en houtrot, hij heeft dus geen behandeling nodig.

FR Souple, durable, esthétique et doux pour l'environnement. Le bois de châtaignier est naturellement insecticide, résistant et imputrescible, il n'a donc pas besoin d'être traité.

EN Flexible, durable, aesthetic and environmentally friendly. Chestnut wood is natural insect resistant and rot-proof, so it doesn't need to be treated.

ES Flexible, duradera, estética y agradable para el medio ambiente. La madera de castaño es naturalmente resistente a los insectos y a la podredumbre de la madera, por lo que no necesita tratamiento.

Douglas - Douglas - Douglas - Pino Oregón

Onbehandeld / Non-traité / Untreated / No tratado

NL Hoge natuurlijke duurzaamheid dankzij een hoog percentage aan kernhout. Douglas is esthetisch, bestendig tegen koude en slijtage en natuurlijk bestendig tegen houtrot.

FR Très grande durabilité naturelle grâce à une forte proportion de cœur du bois. Le Douglas est esthétique, résistant au froid, à l'usure et naturellement imputrescible.

EN Very high natural durability due to a high percentage of heartwood. The Douglas is aesthetic, resistant to cold and wear and naturally resistant to and rot-proof, so it doesn't need to be treated.

ES Alta durabilidad natural gracias a un alto porcentaje de duramen. El pino Oregón es estético, resistente al frío y a la abrasión y naturalmente resistente a la pudrición de la madera.

Hazelaar - Noisetier - Hazel - Avellano

Onbehandeld / Non-traité / Untreated / No tratado

NL Hazelaar is zacht en flexibel maar biedt in de loop van de tijd steeds een goede weerstand. Het brengt door zijn uiterlijk een unieke charme in de tuin.

FR C'est un bois tendre et souple mais qui offre une bonne résistance dans le temps. Il apporte par son aspect, un charme unique pour le jardin.

EN Hazel is soft and flexible, but always offers good resistance. Due to its appearance, it brings a unique charm to the garden.

ES El avellano es blando y flexible, pero con el tiempo ofrece siempre una buena resistencia. Aporta un encanto único al jardín.

HOUT LEEFT - LE BOIS VIT - WOOD IS LIVING - LA MADERA VIVE

Houtknopen - Les noeuds - Knots - Nudos de madera

NL U zal knopen terugvinden in alle houtsoorten, het is een natuurlijk aspect van het hout dat de stevigheid en duurzaamheid van het hout niet beïnvloedt.

FR Vous trouverez des nœuds dans toute essence de bois, c'est un aspect naturel du bois qui ne remet pas en cause la solidité du produit ou durabilité.

EN You'll find knots in any type of wood, it's a natural characteristic of wood that doesn't affect the strength and durability of the product.

ES Encontrará nudos en todas las especies de madera, es un aspecto natural de la madera que no afecta a su resistencia y durabilidad.

Hars - La résine - Resin - Resina

NL Hars kan de neiging hebben om naar de oppervlakte te komen, dit kan makkelijk worden verwijderd door te schrapen met het correcte werktuig of oplosmiddel.

FR La résine peut avoir tendance à remonter à la surface, elle peut être retirée facilement par racle à l'aide d'un outil ou d'un solvant approprié.

EN The resin can have a tendency to rise to the surface, it can be removed by scrapping with the appropriate tool or solvent.

ES La resina puede elevarse a la superficie, puede eliminarse fácilmente raspando con el herramienta o disolvente adecuados.

Kleurverschil - Différences de teinte - Color differences - Diferencia de color

NL Kleurverschillen kunnen ontstaan door de houtafkomst of behandeling en zijn normaal. Dit verschil zal met de tijd verdwijnen onder invloed van zonlicht.

FR Les différences de couleurs peuvent apparaître suivant l'origine du bois ou le traitement et sont normales. La différence de teinte s'estompera avec le temps sous l'effet de la lumière du soleil.

EN Color differences can appear due to the origin of the wood or the treatment and are normal. The color difference will fade over time under the effect of sunlight.

ES Las diferencias de color pueden surgir del origen o tratamiento de la madera y son normales. Esta diferencia desaparecerá con el tiempo bajo la influencia de la luz solar.

Spleten - Fissures - Cracks - Grietas

NL Afhangend van de houtdensiteit zal het hout op constante basis krimpen en vergroten. Dit kan het ontstaan van spleten veroorzaken. Dit fenomeen stelt de eigenschappen van het hout echter niet ter discussie.

FR En fonction des différences de densité, le bois ne se contracte et ne se dilate pas de façon régulière. Cela peut entraîner la formation de fissures. Ce phénomène ne remet cependant pas en cause les propriétés du bois.

EN Based on differences in density, the wood shrinks and expands steadily. This may cause cracking. This phenomenon doesn't affect the properties of the wood.

ES Dependiendo de la densidad de la madera, la madera se reducirá y ampliará de forma constante. Esto puede causar la formación de grietas. Sin embargo, este fenómeno no cuestiona las propiedades de la madera.

Schimmels - Les moisissures - Mold - Hongos

NL Schimmels kunnen zich plaatsen op de oppervlakte van het hout, deze hebben echter geen effect op de sterkte van het hout en kunnen met water verwijderd worden.

FR Des champignons ou dépôts bleuâtres peuvent se former à la surface du bois, ceux-ci n'ont aucun effet sur la résistance du bois et peuvent s'éliminer à l'eau et par simple brossage.

EN Fungi or bluish deposits can appear on the surface of the wood, they have no impact on the strength of the wood and can be removed with water and by brushing.

ES Los hongos pueden depositarse en la superficie de la madera, pero no afectan a su resistencia y pueden eliminarse con agua.

Zoutvorming van hout - Salification du bois - Wood salification - Formación de sal de la madera

NL Groene vlekken ontstaan soms op het hout, deze zijn gevormd door de impregnatiezouten die het hout beschermen tegen insecten en schimmels. Ze hebben geen effect op de duurzaamheid van het hout.

FR Des taches verdâtres apparaissent parfois sur le bois, celles-ci sont dues aux sels d'imprégnation que contient le bois pour protéger celui-ci des insectes et des champignons. Elles n'ont aucun effet sur la durabilité du bois.

EN Greenish stains sometimes appear on the wood, they are due to impregnations salts contained in the timber to protect it from insects and fungi. They have no effect on the durability of wood.

ES A veces aparecen manchas verdes en la madera, que se forman por las sales de impregnación que protegen la madera contra insectos y hongos. No afectan a la durabilidad de la madera.

Gevingerlast hout is een garantie voor kwaliteit - Le bois abouté est un gage de qualité - Finger-jointed wood is a guarantee of quality - La madera ensamblada es garantía de calidad

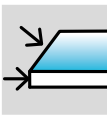

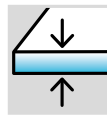

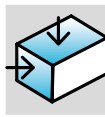

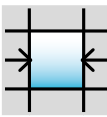

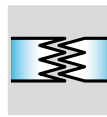

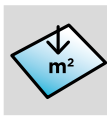

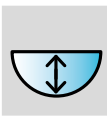

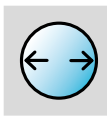

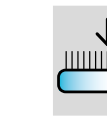

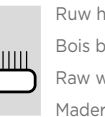

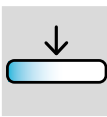

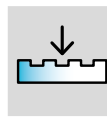

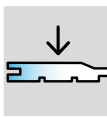

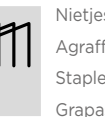

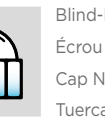

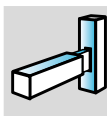

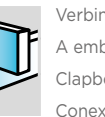

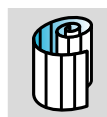

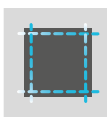

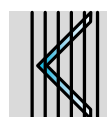

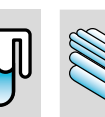

NL Het verlijmen van het hout is een technische handeling die het mogelijk maakt om eventuele 'gebreken' en breekpunten van het massief hout te verwijderen. Ons systeem analyseert en scant de binnenkant van het hout om zwakke punten zoals grote noesten, sapzakken, enz. op te sporen en te verwijderen.

FR Le collage du bois est une opération technique qui permet de supprimer les éventuels "défauts" et points de rupture du bois massif. Notre système analyse et scanne l'intérieur du bois pour détecter et éliminer les points faibles tels que les gros nœuds, les poches de sève, etc.

EN Gluing the wood is a technical operation that makes it possible to remove any 'defects' and breaking points from the solid wood. Our system analyzes and scans the inside of the wood to detect and remove weak points such as large knots, sap pockets, etc.

ES Pagar la madera es una operación técnica que permite eliminar cualquier defecto y punto de ruptura de la madera maciza. Nuestro sistema analiza y escanea el interior de la madera para detectar y eliminar puntos débiles como nudos grandes, etc.

IMPREGNATIE - AUTOCLAVE - IMPREGNATION - IMPREGNACIÓN

NL De meeste van onze tuinhoutproducten zijn onder hoge druk geïmpregneerd in autoclaaf. Het impregnatiekleur is groen, tenzij anders vermeld. Deze behandeling biedt een duurzame bescherming tegen schimmels en houtaantastende insecten. Bij Autoclave klasse 4 zorgt dit voor een garantie van 5 jaar. Bovendien zijn de gebruikte producten arseenvrij, waardoor het beantwoordt aan de gezondheids- en milieunormen.

FR La majorité de nos produits de la gamme bois de jardin ont été soumis à une imprégnation sous haute pression en autoclave. Imprégnation de couleur verte sauf mention explicite. Ce traitement offre une protection durable contre les moisissures et les insectes qui attaquent le bois. Les produits traités en Autoclave classe 4 offrent une garantie de 5 ans. Tous les produits utilisés sont sans arsenic et répondent ainsi aux normes sanitaires et environnementales.

EN The products bearing this label are impregnated in a high pressure autoclave. Color of impregnation is green unless explicitly stated. This treatment provides lasting protection against fungi and wood-destroying insects. The products impregnated in Autoclave class 4 have a warranty of 5 years. The used products are also arsenic free, which means that it meets the health and environmental standards.

ES La mayoría de nuestros productos de madera de jardín se impregnan en autoclave bajo alta presión. El color de impregnación es verde a menos que se indique lo contrario. Este tratamiento ofrece una protección duradera contra el hongos y los insectos que dañan la madera. Con Autoclave clase 4, esto ofrece una garantía de 5 años. Además, los productos utilizados no contienen arsénico, por lo que cumple las normas sanitarias y medioambientales.
